Subject: Microsoft Settlement

I have written on this antitrust case many times over the past few months. Now that the government seems to be doing what is in the best interest of the consumers, I feel that any attempt to "derail" this settlement is just another example of bureaucratic overspending.

Let us put an end to this nonsense and go back to being truly competitive. Agressiveness is not always a dirty word. Sometimes it is just another way of saying "Yankee Trading".

Thank you.

W. Craig Westlake.
